**The Sustainable
Catering Company**

Sustainable Catering

We've set out to make the next decade as sustainable & delicious as possible.

Food Production

Experiential Pop-ups

Food Production

We've been producing our own food in the UK for over four years.

We've created London's Best Vegan Roast, our signature Heritage Burgers, a cafe wholesale range and much more.

As of 2022 we are moved into a new production facility increasing our manufacturing capabilities.

Sustainable Catering

We've supplied the top level of the UK's event scene with a more ecological offering than traditional caterers since 2017.

We were the first fully vegan company to cater The London Marathon.

Our food has been eaten by crowds from the tracks of the Formula 1, the fields of Wilderness Festival and the Queen's Platinum Jubilee.

High Volume Public Events

Corporate Events

Contract Catering

Festival & Event Crew Catering

Weddings & Privates

Film & Set Catering

Bar Hire

We're an 100% Plant-Based company. We understand the needs of the overall food market and pride our dishes on taste and our service on speed & professionalism.

By producing much of our own food we have a greater control on the environmental and ethical impacts of our ingredients.

Our event team is proudly carbon negative. We only use biodegradable or recyclable disposables.

Experiential Pop-Ups

"We've been lucky enough to specialise in experimental plant-based pop-ups. This allowed us the freedom to be creative with innovative menus, locations & collaborations. We started Greenbox to showcase how a vegetarian diet can be exciting and relatable, our journey kept taking us further into the world of sustainability and has become the keystone of what we aim to provide: Making the next decade as delicious and sustainable as possible."

Our Projects

Cocktails

The Hoxton Seven,
Shoreditch, 2018
